Forecast for Thursday 28 Apr 2022

Weather: A chilly start across the park with a touch of frost. Any early morning valley mist or cloud banks on lower slopes will quickly clear to leave a dry morning of long sunny intervals. Fair weather cloud will gradually build to give a cloudier afternoon, especially in the east of the park, but it will remain dry throughout.

Chance of cloud-free hill tops above 600m: Near 100%

Low cloud and visibility: Early valley mist may give briefly locally poor visibility around dawn, visibility very good at all levels otherwise. The odd patch of low cloud may briefly cover summits in the east around dawn, but this will quickly lift, with cloud bases staying clear of the summits for the rest of the day.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Layers are recommended as despite the light winds it will still feel close to or below freezing on the summits during the morning. UV levels are likely to be strong in any sunshine, mainly on the higher routes - sun protection is advised.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Friday 29 Apr 2022

Weather: A cold and crisp start to the morning, with frost in places. Some patches of valley mist and shallow fog may form in the early hours, clearing quickly to leave another dry day with long spells of sunshine and short-lived cloudier periods.

Maximum wind: Northeasterly or easterly 15mph.

Chance of cloud-free hill tops 600m: Near 100%.

Low cloud and visibility: Early morning valley mist or shallow fog may give briefly locally poor visibility around dawn. Cloud bases should remain clear of summits, with generally very good visibility expected at all levels.

Temperature: **Valleys:** Zero Celsius becoming plus 15 Celsius by mid-afternoon.
At 600m: Plus 3 Celsius becoming plus 7 Celsius by mid-afternoon.
Freezing level: Above the summits. Frost at dawn in some valleys.
